Betreff: RE: Submission of Data on MOSH/MOAH in Food

Dear Mr Heeg,

Thank you for your e-mail of 10th May. In reply to your questions below, we would like to refer to your request for access to the data handled by EFSA in 2016. EFSA has replied in three batches as it results from the enclosed correspondence.

As concerns your questions, please see the replies as follows in green:

1. We are aware that when EFSA was requested to prepare the Scientific Opinion of the CONTAM Panel, an ad-hoc call for data on mineral oil hydrocarbons (MOH) was issued in 2010 and the data received are those that were included in the Scientific Opinion. Since 2010 MOH were included in the permanent call for data on chemical contaminants. **Has EFSA ever since received any data on MOSH/MOAH?**

EFSA received the data on MOSH/MOAH that was indicated in the correspondence exchanges with you last year as it results in the enclosed letters.

In addition, since July 2016, after the last letter sent to you on this request, more recently EFSA received additional data from Germany.

If yes:

2. By which group of actors (member state, food business operator, manufacturer or any other party) has EFSA received data? EFSA only received data from the BVL Federal Office of Consumer Protection and Food Safety, Germany;
3. When has the data been submitted and by whom specifically? EFSA received the data on 08/09/2016.
4. Has the data been submitted in the electronic reporting format as set out by EFSA for compilation into a single database? The data was submitted in Excel files but not in electronic reporting and SSD format.
5. How many individual **dates** on products do the submitted datasets comprise? Your request is not very clear. However, assuming that the question number 5 is referring to the number of data records of each file received, there are two files of 22 and 84 records. If this is not the reply you were expecting, please clarify your request.

We trust the above addresses your questions.

Yours sincerely,

[REDACTED]
On behalf of data collection

Subject: AW: Submission of Data on MOSH/MOAH in Food

Dear [REDACTED]

referring to EFSA's permanent call for data on MOSH/MOAH and being aware of the Commission Recommendation (EU) 2017/84 of 16 January 2017 on the monitoring of mineral oil hydrocarbons, foodwatch is happy to share with you its data on MOSH/MOAH. Please find attached the data of the analysis of 120 dry food products with a long shelf life, for which migration levels are typically the highest (e.g. Cornflakes, Pasta, Rice etc.). As mentioned in my previous email, we have tested products packaged in cardboard with and without inner bags. The products have been purchased in France, the Netherlands and Germany. As required by EFSA, we have inserted the data into the Generic Reporting Format. In case you have any questions, please do not hesitate to contact us.

foodwatch is highly interested in the continuation of the call for data and EFSA's data collection on MOSH/MOAH. In this context, we are highly interested in the answers to the following questions:

1. We are aware that when EFSA was requested to prepare the Scientific Opinion of the CONTAM Panel, an ad-hoc call for data on mineral oil hydrocarbons (MOH) was issued in 2010 and the data received are those that were included in the Scientific Opinion. Since 2010 MOH were included in the permanent call for data on chemical contaminants. **Has EFSA ever since received any data on MOSH/MOAH?**

If yes:

2. By which group of actors (member state, food business operator, manufacturer or any other party) has EFSA received data?
3. When has the data been submitted and by whom specifically?
4. Has the data been submitted in the electronic reporting format as set out by EFSA for compilation into a single database?
5. How many individual dates on products do the submitted datasets comprise?

We would highly appreciate an answer until **Tuesday, May 16, 2017**. Thank you very much in advance.

Kind regards
Johannes Heeg

Nein, Sie bekommen dafür keinen 5-Euro-Gutschein – aber viele unbezahlbare Informationen.
